

Hypera punctatua. 6 - taken during spring and summer of 1947 under wood. Not taken elsewhere in Wellington District. I have one from Nanaimo and one from Tofino on the West Coast.

Brachyrhinus ovatus. Fairly common. Not frequent elsewhere, usually in dry situations.

NOTES ABOUT GERMAN AND AUSTRIAN COLEOPTERISTS

H. Klapperich
Bonn - Germany

Part I

List of Determiners and Revisors

The following list gives the names and address of whether a determiner, or a current revisor, or both, for the family indicated. In all cases, it is necessary to make previous arrangements with the person, whom you would like to have determine your material, before you send any specimens. To the best of the author's knowledge, all listed are responsible scientists.

Benick, L. Dr., (24a) Lübeck, Viktoriastr. 7, Germany.
